Education

Degree/Certificate	Institute / Board	CGPA/%	Year
M.Sc., Autonomy Technologies	FAU Erlangen-Nürnberg	-	Oct 2026 – Present
B.Tech, Electronics and Communication Engineering	Gokaraju Rangaraju Institute of Engineering and Technology	8.39	Nov 2021 – May 2025
Senior Secondary (Intermediate)	NSR Impulse Junior College	988/1000	July 2019 – April 2021
Secondary School Certificate	Matrusri High School	9.8/10	June 2018 – March 2019

Experience

- **Anasol Consultancy Services [🌐]** *Apr 2025 – May 2026*
  Associate Software Engineer Hyderabad, India
  - Contributed to production-grade ERP systems (products and software modules) and a job recommendation platform.
  - Worked with Kubernetes, LangChain, Kafka, Redis, Docker, CI/CD pipelines, and AWS Lambda to build scalable backend services.

Projects

- **ApiSynIQ – Talk to Your APIs** *Nov 2025*
  Deep Agents, Go, LangChain, RAG, Spring AI, gRPC, TTS, STT [GitHub]
  - Built a voice-driven AI assistant that enables natural language interaction with APIs, eliminating the need for complex UIs by automatically planning API calls and filling parameters.
  - Implemented Deep Agents for API execution planning and an API-resolver sub-agent using LangChain; enabled inter-service communication via gRPC and integrated RAG in Spring Boot.
- **Robotic Vehicle for Autonomous Navigation** *Jan 2024*
  Agentic AI, Deep Agents, LangChain, LangGraph, Raspberry Pi, Arduino, Docker [GitHub]
  - Developed an autonomous robotic vehicle capable of task planning, human communication, and object transport using natural language instructions.
  - Implemented A* algorithm for optimal path planning and Deep Agents for natural language understanding, deployed on Raspberry Pi OS.
- **Open-source Helm charts and Terraform modules** *June 2025 - current*
  Tools: Terraform, Kubernetes, AWS
  - Maintaining the repository which has production-grade Helm charts for Kafka, Redis, Certificate authorities' [GitHub]
  - Opensource Repository for managing AWS workloads with Terraform like Kubernetes, S3 buckets, Web Hosting life cycle using Cloud Front, S3 and Route53, etc. [GitHub]

Skills

- **Programming Languages**: Java, Python, CPP, GO, HashiCorp Configuration Language
- **Technologies**: Machine Learning, Deep Learning, AgenticAI, Computer Vision, Kubernetes, CI/CD, Terraform, HELM, Spring-boot
- **Tools**: AWS, TensorFlow, PyTorch, OpenCV, Langchain/LangGraph, Docker, Raspberry Pi, Isthio, Kafka, Redis, GitHub Actions

Research Paper

- **Natural Language Based Autonomous Navigation Vehicle**, IEEE *June 2025*

Positions of Responsibility

- **Backend and Devops,** Junior Developers *April 2025*
- **Mentor,** AAC (Advance Academic Center) *March 2023*
